TECH SKILLS

Languages

Javascript | HTML |
CSS | JSX

Front End

React | React-Native |
Hooks | Webpack

Back End

Axios | Express |
MySQL | PostgreSQL |
MongoDB/Mongoose |

Other Tools

Git/Github | Node.js |
Underscore | Docker/Dockerhub |
Nginx | Jest |
React Testing Library |
AWS | ECS |
CircleCi | New Relic |
Loader.io | Postman

EDUCATION

CERTIFICATE OF COMPLETION

Python Fullstack Bootcamp
PDX Code Guid
Currently Enrolled - 2021

CERTIFICATE OF COMPLETION

Software Engineering
Immersive
Hack Reactor
2021

BACHELORS DEGREE PARTIAL

in Computer Science
National University
2018 – 2018

ASSOCIATES DEGREE in

Computer Science
National University
2018

INTERESTS

Travelling
Mountain/Road Biking
Journaling
Motorcycles

SOFTWARE APPLICATIONS github.com/gabinochacon8

VENDICATOR | React Native, Node, Cocoapods, Google Maps API, Firebase Auth, React Navigation, Axios

Designed a personal mobile application that allows vendors to indicate their location so anyone can find a specific product they're looking for. Designed for the smallest vendors in mind including the elote person, a garage sale, flower person, etc.

- Implemented **React Native** as the framework to design the app with a smooth UI experience with different tabs and search capabilities
- Integrated map using **Google** Maps API that shows most current vendor locations within 2000 meters and live location to find them

TRAVEL BUG | React Native, Node, Cocoapods, Google Maps API, Firebase Auth, MongoDB, PostgreSQL

Incorporated Map feature on a mobile app for a travel abroad company.

- Integrated **Google Maps** places API to allow users to search any place. Also provided preloaded pins for all events in itinerary that day and emergency places such as embassy, police dep, and hospital near them, that they can send to Apple or Google maps app to get step by step directions
- Implemented **Firebase** authentication sign in based on admin or student

PROJECT CATWALK | React, CSS, Node, Webpack, Jest, Axios, RTL, SC, Express.js, REST API, K6, AWS, Nginx, Loader.io, Docker

A full stack retail e-commerce application complete with articulate design and easy to follow User Interface(UI) with a specific product's informational overview, questions/answers, and ratings/reviews..

- Formulated product overview feature using **React** and bundled with **Webpack** to meet 100% of the deliverables specified by the business requirements document from the client
- Tested with **Jest**, **React Testing Library(RTL)**, and **CircleCI**, to reach 70% test coverage
- Formulated database for api using **PostgreSQL**. Created schema and migrated 14GB of CSV data using ETL and loaded on **AWS** with **Docker**. Optimized backend by carefully testing with **Loader.io** and implementing **Nginx** load balancer with 6 server instances launched with **AWS ec2** to withstand **1000rps**, with 0% error, at 200ms

EXPERIENCE

MOBILE EXPERT

T-MOBILE | 2014 - 2018

Mobile device and activation sales for consumer and business accounts

- Awarded a Winners Circle award where I was top 10% in the nation
- Generated 10 leads a week using Salesforce, and managed business accounts
- Composed creative sales pitches and practiced daily to deliver effeciently

DIESEL MECHANIC

US MARINE CORPS | 2010 - 2014

Non-Comissioned Officer - Corporal of Marines

- Capable of diagnosing and repairing anything on 4 wheels
- Lead mechanic during deployment as part of a small crew with the wrecker team; and tasked to fix or retrieve disabled vehicles in country
- Became a diagnostics chief able to sign off on echelon 3 tickets
- Gained skills to perform duties under high stress and dexterity to find solutions with limited resources
